

Please amend the subject application as follows:

IN THE CLAIMS

Amend claims 1 and 10 to read as follows:

-
1. (Amended) A liquid crystal display device, comprising:
- a first substrate;
 - a second substrate; and
 - a liquid crystal layer interposed between the first substrate and the second substrate,
- wherein the first substrate includes a plurality of switching elements, a plurality of picture element electrodes connected to the plurality of the switching elements and a plurality of color filters which are arranged so as to correspond to the plurality of the picture element electrodes on an area of the first substrate corresponding to a display region of the liquid crystal display device, and a light shielding frame layer around a periphery of the display region, and
- wherein there is no gap between each picture element electrode at the periphery of the display region and the light shielding frame layer.
-
10. (Amended) A method for producing a liquid crystal display device including a first substrate, a second substrate and a liquid crystal layer interposed between the first substrate and the second substrate, the method comprising the steps of
